

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS 합동 : 두 직각삼각형의 빗변의 길이와 다른 한 변의 길이가 각각 같을 때 합동이다.

(RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

⇒ RHS 합동
(RHS Congruent)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

⇒ RHS 합동
(RHS Congruent)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

⇒ RHS 합동
(RHS Congruent)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

⇒ RHS 합동
(RHS Congruent)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

⇒ RHS 합동
(RHS Congruent)

RHS Congruent : If two right-angled triangles have their hypotenuses equal in length, and a pair of shorter sides are equal in length, then the triangles are congruent.

\Rightarrow RHS 합동
