$$a \div b = a \times \frac{1}{b} \ (b \neq 0)$$

$$a \div b = a \times \frac{1}{b} \ (b \neq 0)$$

$$a \div b = a \times \frac{1}{b} \quad (b \neq 0)$$

$$a \div b$$

▸ Start

$$a \div b = \frac{a}{b}$$

▸ Start

$$a \div b = \frac{a}{b}$$

$$= a \times \frac{1}{b}$$

$$a \div b = a \times \frac{1}{b} \quad (b \neq 0)$$

$$a \div b = \frac{a}{b}$$

$$= a \times \frac{1}{b}$$

$$\therefore$$

▶ Start

$$a \div b = \frac{a}{b}$$

$$= a \times \frac{1}{b}$$

$$\therefore a \div b = a \times \frac{1}{b} \ (b \neq 0)$$

▸ Start

$$a \div b = \frac{a}{b}$$

$$= a \times \frac{1}{b}$$

$$\therefore a \div b = a \times \frac{1}{b} \ \ (b \neq 0)$$

END
